## **Introduction**

Paiwt The Board Game is played with up to six players who complete artistic pieces according to these instructions. The game follows standard board game protocol where players take turns, draw Paiwt Cards, and make strategic decisions. Following the commands on the Paiwt Cards directs players in the construction of art creations, called Unique Paiwt Explosions, that can subsequently be converted into Enjin ERC-1155 Tokens.

# Paiwt Board

The game is played using a Paiwt board covered with a provided plastic sheet on a flat level surface. The board consists of five three layered starting areas: one in the middle, and four in the corners, with two diagonals.

# Paiwt Cards

Paiwt Cards indicate which play you can make on your turn. The full deck consists of 42 cards:

(14) two of each Color Drop

(14) two of each Colored Medium Pour

(7) three Blow, two Blow + Drop\*, two Pour + Blow\*

(7) three Brush, two Brush + Drop\*, two Pour + Brush\*

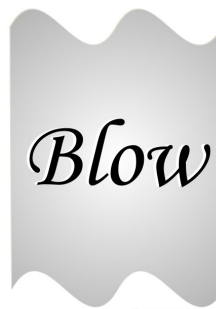

\*Two card combinations must be combined with the appropriate card, i.e. a Pour + Brush must be used with a Medium Pour Card, and a Blow + Drop must be used with a Color Drop Card.

## Materials

Materials included in this board game for creating your Unique Paiwt Explosions:

- (7) Dropper Bottles of ArtWaters Colors (red, green, blue, yellow, orange, pink, purple)
- (7) Mixing Cups
- (1) Dual-Chambered 8 oz Bottle of ArtWaters Medium
- (1) Paiwt Board with Plastic Cover Sheets
- (1) Deck of Paiwt Cards
- (1) Paint Brush

## Pregame Preparation

*Mixing your colored medium:*

Using your mixing cups, pour ArtWaters Medium to fill half way. Then using your Artwaters Color droppers, drop up to 10 drops of a single color and mix.

*Card organization:*

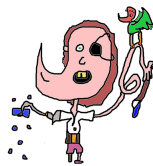

Take all the Paiwt Cards and organize them into the four categories: Pour, Drop, Brush, and Blow. Then shuffle each pile. All participating players now draw four cards, one from each category. The remaining cards are then mixed up and placed face down. A first player is picked.

## Gameplay Sequence

The first player to act draws a card from the face down pile, then discards one card face up into the discard pile (If the current player can only play one card, he/she can not discard it. The player must keep their only playable card, and discard another card face up into the discard pile).

Next the player plays one card, if he/she is able to, then the player places their used card onto the discard pile face up. The player must complete their play before he/she is able to end their turn. Even if the player is unable to make any play, he/she must draw a card before ending their turn.

The next player now continues as described above.

# Unique Paiwt Explosion

## *The Unique Paiwt Explosion Sequence:*

1. Pour Colored ArtWaters Medium into starting area circle.
2. Blow ArtWaters Colored Medium to second layer circle.
3. Drop first ArtWaters Color in center.
4. Pour second ArtWaters Colored Medium in center.
5. Starting in the center, brush outward with at least eight extension points towards the outer third layer.
6. Drop second ArtWaters Color to finish.

## *UPE Rules:*

- Four different colors are used in each UPE.
- Four different layers are used in each UPE: Layer 1 is the first pour, layer 2 is the first drop, layer 3 is the second pour, and layer 4 is the second drop.
- Once a color has been used in a layer it can not be used in the same layer.

## **Winning the Game**

The game ends when a player wins the game by declaring “Paiwt” as one of the following occurs:

1. A player completes the last of three Unique Paiwt Explosions in a diagonal line.
2. A player plays every Paiwt Card in their hand.

The winner may now complete all remaining UPEs.

## **After the Game**

Once you have finished the game, wait until fully dry. Drying time depends on the amount and thickness, colors used, humidity, etc. We recommend 24-48 hours of drying time before peeling. Once fully dry your Unique Paiwt Explosion will peel off of your plastic covered Paiwt Board, leaving a clean plastic surface.

## **Conversion to Enjin ERC-1155 Token**

Submit an unedited scan of your Unique Paiwt Explosion. Set scanner for a full 8” x 10”. Each Paiwt game comes with one free minting, converting your scan into an official Paiwt UPE ERC-1155 Token powered by Enjin. Learn more about Enjin at <https://enjincoin.io>.
